# Accuris CONNECT for Mobile Operators
Simplify building a Wi-Fi footprint

Wi-Fi is a critical component of meeting the capacity and coverage requirements of a mobile society. But no single Wi-Fi network is enough. Service providers are left cobbling together a mish-mash of locations, capabilities, security and authentication technologies.

To simplify the process of building and managing Wi-Fi networks, Accuris created CONNECT, a connect-once, use many, platform designed to create a custom Wi-Fi fabric that meets the demands of a data-hungry customer base.

Service Provider

Accuris CONNECT
Cloud Platform
(Carrier Wi-Fi Roaming, Offload)

Wi-Fi Calling •

IOT / Wi-Fi Access •

Secure Wi-Fi / VPN Access •

• Settlement / Cleaning

• Venue / Portal

• Policy / QoE Access

VPN / IWF

Wi-Fi   Wi-Fi   Wi-Fi   Wi-Fi

ACCURIS CONNECT
THE ONE PLATFORM FOR BUILDING OUT CARRIER Wi-Fi ROAMING AND OFFLOAD SERVICES

CONNECT ONCE, USE MANY

Establishing connectivity between networks can be costly and time-consuming. The CONNECT platform is designed to take the headaches out of interworking Wi-Fi networks around the world.

CONTROL YOUR Wi-Fi NETWORK

With CONNECT, service providers can build the Wi-Fi network they want – setting direct agreements, controlling rates and managing priorities, all from a single dashboard

DIRECT SUPPLIER RELATIONSHIP

CONNECT brings buyers and sellers together, and there's no fee for Wi-Fi providers to join. Usage rates and commitments are done direct between providers with CONNECT as the transit point.

PAY AS YOU GROW

CONNECT is a SaaS platform, designed to start small and scale quickly. It's pay as you grow, with no commitments or costly minimums.

For Mobile Operators

CONNECT is the platform for MNO's to control Wi-Fi.

For mobile operators, one Wi-Fi provider isn't enough. With CONNECT, MNO's can easily add new Wi-Fi networks to create the Wi-Fi fabric they need, without the middleman.

- **Bring Mobile Policy to Wi-Fi.** Give your subscribers the same service on Wi-Fi as on mobile.

- **Control your Wi-Fi.** Move, add, change providers as needed.

- **Assure QoE.** Monitor and measure subscriber's Wi-Fi experience through advanced analytics.

- **Arbitrage costs effectively.** Prioritize network providers by a range of parameters, including cost.

- **Create peering relationships.** Like roaming, CONNECT lets MNO's create peer relationships.

- **Secure Your Subscribers' Wi-Fi.** Ensure the safety of their access to the Internet.

For Wi-Fi Operators

The next wave of Wi-Fi users are smartphones. Simplifying how mobile operators can work with Wi-Fi will drive more users, and more revenues.

Accuris CONNECT overcomes the headaches of connecting to multiple Wi-Fi hubs and aggregators.

- **One Connection. Billions of Users.** Attract all kinds of smartphone Wi-Fi users.

- **No costs to join.** CONNECT is always free for Wi-Fi providers.

- **Direct supplier relationship.** Negotiate rates with mobile operator hub providers directly.

- **Connect once, use many.** Accuris is connected with the largest MNO's Wi-Fi hubs today.

About Connect

CONNECT is a SaaS platform providing VPN inter-working connectivity between Wi-Fi networks and mobile operators.

CONNECT enables mobile operators to easily add or expand Wi-Fi for OFFLOAD or ROAMING services.

CONNECT gives Wi-Fi providers access to millions of mobile providers from a single connection.

ABOUT ACCURIS NETWORKS

Accuris Networks helps service providers monetise the connectivity between networks. Accuris solutions enable subscribers to move seamlessly and securely between LTE, GSM, Wi-Fi, IPX and fixed networks while ensuring a superior quality of experience.

We are a trusted supplier to blue-chip operators around the world including AT&T, Bell Canada, China Mobile, EDCH, Mobily, Telefonica and more.
